

RFP 17-01 ADDENDUM 1

Please note the following changes to RFP 17-01:

Change Bid Opening Date from - 2:00 pm, February 27, 2017

CHANGE BID OPENING DATE TO – 2:00 pm, March 1, 2017

Road Maintenance Crew Requirement:

Change from – Field crew must consist of a minimum of 3 personnel.

CHANGE TO – Field crew must consist of a minimum of 4 personnel

Questions and Answers:

1. Will the City provide roll-off containers or some other means for the disposal of construction materials and debris from the services being provided for the road maintenance as well as the storm water maintenance? A. [Construction debris is currently hauled to the Doraville Transfer Station for disposal. The cost is paid directly by the city.](#)

2. If not, would this be considered a pass through expense for reimbursement due to the fact there is no way to forecast the amount of debris that would need to be disposed of? A. [See the response to previous question.](#)

3. Will the debris from the storm drain system need to be tracked for MS4 reporting purposes? Will this be the responsibility of the contractor? A. [No.](#)

4. The General Information states this is a Road and Stormwater “MAINTENANCE AND REPAIR” contract. The Scope of Work requires a current Georgia “Utility Contractor” license. But, ALL our other eight (8) City clients in Georgia do NOT require us to possess a special license for Repair Services and ONLY require a “Utility Contractors license” for new construction. We have insufficient time to complete testing and certification for a new Georgia license which has NOT been required anywhere else. This is a repair contract, not new construction. Can’t this item be waived? A. [A utility contractor’s license is required. If the company does not have one, the proposal should include a commitment to obtain one with a timeframe for getting the license](#)

5. Is this a requirement for both the road maintenance and the stormwater maintenance? A. [Yes.](#)

6. Can we get a copy of the sign in sheet from the pre-proposal meeting? A. [The sign in sheet is posted on the website](#)

7. Are we allowed or able to sub out portions of work that we do not usually self perform, such as Asphalt? A. Subcontracting is acceptable provided that the proposals identify the portions of the work to be subcontracted and the names of the subcontractors that will be used.
- 2) Can the superintendent also perform in the capacity as road maintenance foreman and storm water foreman if qualified? A. Yes.
